

*Look to the sky and what do I see
An angel watching over me
She's in the clouds, soft as a feather
As we dance across the sky together
She's in the sun's rays shining bright
As it warms my heart and holds me tight
She's in the moon beams loving glow
As the stars twinkle and start their show
She's in the birds flying across the sky
As she whispers to me not to cry
Because we're always together, never apart
Sweet like a dream held close to my heart
Never gone, just in a different place
Forever happy and healthy and safe*
